

DOWNLOAD LINEAR TIME BRANCHING TIME AND PARTIAL ORDER IN LOGICS AND MODELS FOR CONCURRENCY SCHOOL WORKSHOP NOORDWIJKERHOUT THE NETHERLANDS MAY 30 JUNE 3 1988 THE BRAND FLIP WHY CUSTOMERS NOW RUN COMPANIES AND HOW TO PROFIT FROM IT THE BRAND GAP

linear time branching time pdf

The Linear Time - Branching Time Spectrum (extended abstract) R.J. van Glabbeek Institut for Informatik der Technischen Universität Arcisstraße 21, D-8000 München 2, Germany In this paper eleven semantics in the linear time - branching time spectrum are presented in a uniform, model-independent way. Restricted to the domain of finitely branching, concrete, sequential processes, most seman-

Branching vs. Linear Time: Semantical Perspective Version 1.1? Sumit Nain and Moshe Y. Vardi Rice University, Department of Computer Science, Houston, TX 77005-1892, USA

Branching vs. Linear Time: Semantical Perspective Version 1

Keywords: coalgebra, linear time, trace 1. Introduction When analysing process behaviour, one of the early choices one has to make is between a linear and a branching view of time. In branching-time semantics, the choices a process has for proceeding from a

From Branching to Linear Time, Coalgebraically - CORE

12 From Branching to Linear Time, Coalgebraically In our view, one of the reasons for only a partial success in developing a fully general coalgebraic

Expressibility Results for Linear-Time and Branching-Time Logics E. M. Clarke, I. A. Draghicescu Computer Science Department Carnegie Mellon University

Expressibility Results for Linear-Time and Branching-Time

linear time equivalence is trace equivalence as employed in Hoare [1980]; the standard example of a branching time equivalence is observation equivalence or bisimulation equivalence as defined by Milner

[1980] and Park [1981] (cf. Milner

Branching Time and Abstraction in Bisimulation Semantics

conclusions regarding branching versus linear time logic in general are not justified on this basis. We will argue that there are several different aspects to the problem of designing and reasoning about concurrent programs. While the specific modalities needed in a logic depend on the precise nature of the purpose for which it is intended, we can make some general observations regarding the ...
