### Malicious Malware Software - athena.ecs.csus.edu

A while ago some of you may remember me saying that I was so bored of there being no decent malware to reverse, that I might as well write some. Well, I decided to give it a go and I've spent some of my free time developing a Windows XP!

### Coding Malware for Fun and Not for Profit (Because that

Malware (a portmanteau for malicious software) is any software intentionally designed to cause damage to a computer, server or computer network. Malware does the damage after it is implanted or introduced in some way into a target's computer and can take the form of executable code, scripts, active content, and other software. [2]

Due to the popularity of portable document format (PDF) and the increasing number of vulnerabilities in major PDF viewer applications, malware writers continue to use the format to deliver malware via web downloads, email attachments, and other methods in both targeted and non-targeted attacks.

### Sophos Security Labs: Real-Time Malware Threat Prevention

When performing malware analysis, it's convenient to use virtualization software when setting up your lab. Such tools typically simulate the underlying hardware, allowing you to run multiple instances of "virtual" machines simultaneously. For instance, you could use Windows 7 as your base OS, while having a separate instance of Windows XP running in another window, and a Linux instance ...
